About Me

Hi, I'm Rafael, a Full-Stack Developer with experience in both Front-end and Back-end development. I have a strong focus on React/TypeScript and integration with .NET/C# and SQL. In the IGFEJ Asset Management project, I have taken on a front-end leadership role, ensuring implementation consistency, team alignment, and stable deliveries. I enjoy working with well-defined processes and helping teammates unblock more complex technical issues when they arise.

Skills

Core skills (current stack):

- React
- TypeScript
- C# / .NET
- SQL

Other technologies:

- JavaScript, HTML, CSS
- Tailwind CSS
- Node.js
- Java
- Python
- MongoDB

Tools / DevOps / Platforms:

- Azure DevOps (pipelines, boards, repos)
- Kubernetes + Lens (cluster monitoring/management)
- pgAdmin
- Git

Experience

Axians — Front-End Developer (Lead Front-End on the project)

May 2025 — Present

Asset Management Project — IGFEJ (Justice Sector)

- Quickly integrated into the team and became a consistent contributor to product delivery, with a strong focus on front-end quality and reliability.
- Took on the technical lead role for the front-end within the project, helping define standards, approaches, and consistency across features.
- Actively supported teammates through reviews, troubleshooting, and quick alignment sessions, encouraging collaboration and maintaining a strong delivery pace.
- Implemented and maintained critical product components and flows, including interfaces, forms, tables, and API integrations, ensuring reusability and consistent behavior.
- Developed highly flexible and dynamic front-end structures and behaviors, enabling reuse, adaptation to different scenarios, and product evolution with minimal rework.
- Helped reduce rework by reinforcing good implementation practices and code organization, also making onboarding and maintenance easier.
- Gained hands-on experience with Azure DevOps and exposure to Kubernetes (including Lens), as well as tools like pgAdmin and daily work with SQL.

Freelance — Full-Stack Developer

June 2023 — May 2025

Client projects and portfolio work

- Developed and maintained websites and applications for different needs, with a focus on stability, organization, and a strong user experience.
- Strengthened my back-end foundations by implementing logic and integrations aimed at robust and scalable solutions.
- Improved front-end quality with attention to responsive design, visual clarity, and clean integration between front-end and back-end.

Education

Escola Filipa de Lencastre — Science and Technology

2016 — 2018

ISCTE — Bachelor's Degree in Computer Engineering

2018 — 2021

ISCTE — Master's Degree in Computer Engineering

2021 — 2022
